SPECIALISTI DELL'OUTDOOR

SPECIALISTS IN OUTDOOR FURNITURE

Da più di 30 anni realizziamo arredi per l'outdoor studiati per il benessere, la convivialità e il relax delle persone. Il polipropilene e l'alluminio sono i materiali che abbiamo selezionato sia per la loro totale riciclabilità sia per le qualità che li rendono particolarmente adatti agli spazi all'aperto. Abbinati a tessuto sintetico, imbottiti e vetro si rivolgono a progetti contract e residenziali con soluzioni che si distinguono per design originale, funzionalità e versatilità.

For more than 30 years, we have been designing and producing outdoor furniture tailored to people's well-being, socialising and relaxation. Polypropylene and aluminium are the materials we have selected, as they are totally recyclable and have qualities that make them particularly ideal for outdoor areas. Combined with synthetic fabric, padded elements and glass, they are intended for contract and residential projects with solutions that stand out for their original design, functionality and versatility.

DESIGN E MADE IN ITALY

DESIGN AND MADE IN ITALY

Cura di forme, ergonomia e dettagli, alta qualità di materiali e lavorazioni, attenzione all'ambiente e razionalizzazione delle risorse: il design di Nardi racchiude una visione progettuale ampia e, oltre a una prospettiva di produzione, è strumento di ricerca e innovazione continua. Progettare e dare forma a idee originali, proporre soluzioni con uno sguardo proiettato al futuro, realizzare prodotti che tengano conto di sostenibilità etica e ambientale in una filiera quasi a chilometro zero, è la nostra idea di design e di Made in Italy.

Focusing on shapes, ergonomics and details, high-quality materials and workmanship, respect for the environment and rationalised resources: Nardi's design embraces a broad project vision, which is not only a perspective on production but also a means of continuous research and innovation.

Designing and shaping original ideas, proposing solutions that look to the future, creating products that consider ethical and environmental sustainability in an almost entirely locally sourced supply chain, this is our idea of Made in Italy and design.

SVILUPPO SOSTENIBILE

SUSTAINABLE DEVELOPMENT

Da sempre attenti all'ambiente, nel 2019 abbiamo creato la linea produttiva Regeneration, dedicata alla realizzazione di arredi in plastica post consumo. Nello stesso anno abbiamo introdotto le analisi LCA su diversi prodotti al fine di mettere progressivamente in atto ulteriori azioni per migliorare le nostre performance in ottica green. Tutti i nostri siti produttivi sono in continua evoluzione per mantenere l'avanguardia impiantistica e ambientale e, entro il 2023, contiamo di riuscire a utilizzare solo energia ricavata da fonti rinnovabili.

Always aware of the environment, in 2019 we created the Regeneration production line, dedicated to producing post-consumer plastic furniture. In the same year, we introduced LCA analysis on several products in order to gradually implement further actions to improve our green performance. All of our production sites are constantly evolving to ensure state-of-the-art facilities and environmental standards. By 2023, we expect to be able to use only energy from renewable sources.

TECNOLOGIA ED ESPERIENZA

TECHNOLOGY AND EXPERIENCE

Ricerca e avanguardia tecnologica sono principi cardine della nostra filosofia aziendale ma il valore più importante rimane ancora la nostra esperienza e la capacità di applicarla per innovare il presente e immaginare il futuro.

La competenza pluri-trentennale nel settore certifica la validità e la sicurezza delle nostre proposte mentre la profonda conoscenza del comportamento fisico-tecnico del polipropilene ci ha permesso di diventare pionieri anche nella produzione industriale di mobili realizzati in plastica riciclata.

Research and cutting-edge technology are cornerstones of our corporate philosophy, but the most important value is still our experience and the ability to apply it in order to innovate the present and envisage the future. Our many years of expertise in the sector prove the validity and safety of our solutions, whereas our in-depth knowledge of the physical and technical nature of polypropylene has also enabled us to become pioneers in the industrial production of furniture made from recycled plastic.

QUALITÀ AFFIDATA ALLE PERSONE

*QUALITY
ENTRUSTED TO PEOPLE*

La qualità sta nei processi codificati, nell'evitare gli sprechi, nel lavorare con responsabilità e nel dare fiducia alle persone. Ogni nostro arredo esprime l'impegno e la nostra volontà e capacità di evolvere costantemente, allenandoci all'innovazione continua. Ma dietro a ogni azione e procedura che determina la qualità dei nostri mobili da esterno ci sono le persone che lavorano con noi. Il successo di ogni prodotto è frutto del loro talento e di una filosofia aziendale dove relazione, dialogo e valore del team sono alla base di ogni rapporto.

Quality lies in encoded procedures, avoiding waste, working responsibly and in putting trust in people. Every piece of our furniture expresses our commitment, willingness and ability to constantly evolve and continuously innovate.

But behind every action and procedure that determines the quality of our outdoor furniture are the people who work with us. The success of each product is the result of their talent and a corporate philosophy, where connection, interaction and team value are at the heart of every relationship.

regeneration

Il nostro impegno nel realizzare prodotti dall'alto valore aggiunto e sostenibili per l'ambiente ci ha portati a inaugurare nel 2019 il programma industriale Regeneration per la produzione di arredi per esterno in plastica riciclata.

Li facciamo in uno stabilimento progettato con tecnologie all'avanguardia a livello impiantistico, dotato di presse a iniezione ibride ad alto risparmio energetico nelle quali il sistema di raffreddamento utilizza l'aria senza impiegare acqua e consumando pochissima energia elettrica. Quest'ultima è generata, in gran parte, da un sistema di pannelli fotovoltaici.

Regeneration è molto più di una semplice linea di prodotti in plastica riciclata e ci permette di sperimentare soluzioni applicabili su larga scala a tutto il ciclo produttivo coinvolgendo tutte le fasi, dall'ideazione dei singoli arredi fino al loro imballaggio.

Per quest'ultimo aspetto per la linea Regeneration tutti gli imballi di protezione e i relativi sostegni interni sono in cartone riciclato certificato FSC e polietilene a bassa densità completamente riciclabile, entrambi progettati in modo da ridurre al minimo il loro impiego.

Infine, ci impegniamo ogni giorno a mettere progressivamente in atto azioni per migliorare le nostre performance ambientali grazie alle analisi LCA (Life Cycle Assessment), metodologia analitica e sistematica che valuta l'impronta ambientale dei nostri nuovi prodotti lungo il loro intero ciclo di vita.

Per maggiori informazioni visita
www.nardioutdoor.com/regeneration

Our commitment to making environmentally sustainable products with high added value led us to launch the Regeneration industrial programme, in 2019, for the production of outdoor furniture in recycled plastic.

We make our products at a production plant designed with cutting-edge plant engineering technology. It is equipped with energy-saving hybrid injection presses, with an air-based cooling system without using water and consuming very little electricity. Most of the electricity used is produced by a photovoltaic panel system.

Regeneration is much more than a simple line of recycled plastic products. It allows us to experiment with solutions that can be applied on a large scale to the entire production cycle and involves all steps, from the concept creation of individual furniture items to their packaging.

For more information visit
www.nardioutdoor.com/regeneration

For the Regeneration line, all protective packaging and related internal supports are made of FSC-certified recycled cardboard and fully recyclable low-density polyethylene, both designed to minimise their use.

Lastly, every day we strive to gradually implement actions to improve our environmental performance by means of LCA (Life Cycle Assessment) analysis, an analytical and systematic methodology that assesses the environmental footprint of our new products throughout their entire life cycle.
